Describing trends 1

Worksheet

D Choose two trends in your life related to the theme of 'time management'. For example:

Time spent ... with children / with friends / in the garden / doing sport / learning English
doing homework / abroad / in meetings / writing reports / doing overtime

Prepare simple graphs and write notes to practise the language of trends. The examples below will give you some ideas. Notice the use of language from section B.

Time spent in the garden last year

- Vertical axis shows hours per week, horizontal axis shows seasons
- Little time spent in the garden in winter due to cold weather
- More time in spring, although mainly at weekends
- Time rose in summer because of holidays and meals outside
- Steady decrease during autumn

Time spent doing homework last week

- Vertical axis shows hours per day, horizontal axis shows days
- Little time on Monday because of feeling tired
- Small increase on Tuesday (I read a magazine article)
- Fall to zero on Wednesday, but dramatic rise on Thursday due to time preparing presentation
- As regards the weekend, only one hour on Saturday

E Work with a partner. Change roles when you finish.

Student A Describe some trends

- in your company last year (sales, profits, market share etc.)
- in your country last year (inflation, unemployment, house prices etc.).

Examples: *Last year our profits fell slightly, due to difficult market conditions.*

In relation to house prices, there was a small increase, although it was about the same as inflation.

Student B Ask Student A to explain the trends in a little more detail.

Can you tell me a little more about that?

So why ... ?

And what is the Government doing about that?
