

# Approve a Four-Week Workflow Pilot

Reducing import document handoff delays

Decision today: pilot, owner, review measures

# Handoff Notes Are Spread Across Three Places

- Ownership is unclear before the cutoff window
- Email: messages split
- Spreadsheet: copied details
- Short messages: owner unclear

# Most Delays Involve Unclear Handoff Notes

- 61% linked to unclear notes
- 38 late handoffs
- 22 minutes average rework

# One Shared Log Makes Ownership Visible Earlier

## Current

- Email check
- Manual note
- Handoff
- Deadline risk

## Pilot

- Exception log
- Fixed checkpoint
- Visible owner
- Control unchanged

# The Pilot Is Limited and Controlled

- Test before expanding
- Week 0: review fields
- Weeks 1-4: daily checkpoint
- End: review delay, rework, and feedback

# The Request Is Approval, Ownership, and Review Criteria

- Approve the pilot
- Confirm the documentation lead
- Agree the review measures
