

Approve a Four-Week Workflow Pilot

Reducing import document handoff delays

Decision today: pilot, owner, review measures

Handoff Notes Are Spread Across Three Places

- Email: messages split
- Spreadsheet: copied details
- Short messages: owner unclear
- Emphasis: ownership is unclear before the cutoff window

Most Delays Involve Unclear Handoff Notes

- 38 late handoffs
- 61% linked to unclear notes
- 22 minutes average rework
- Emphasis: unclear notes are the main preventable cause

One Shared Log Makes Ownership Visible Earlier

Current

- Email check
- Manual note
- Handoff
- Deadline risk

Pilot

- Exception log
- Fixed checkpoint
- Visible owner
- Control unchanged

The Pilot Is Limited and Controlled

- Week 0: review fields
- Weeks 1-4: daily checkpoint
- End: review delay, rework, and feedback
- Emphasis: test before expanding

The Request Is Approval, Ownership, and Review Criteria

- Approve the pilot
- Confirm the documentation lead
- Agree the review measures
